

NILE bank

1- List all categories

<http://198.162.1.51:8040/api/v1/category>

response :

```
[
  {
    "id": 1,
    "name": "Telecom",
    "description": "Telecom",
    "imageUrl": "/images/telecom.png"
  },
  {
    "id": 2,
    "name": "Government",
    "description": "Government Services",
    "imageUrl": "/images/governmetn.jpg"
  },
  {
    "id": 3,
    "name": "Single Phase",
    "description": "Single Phase",
    "imageUrl": "/images/governmetn.jpg"
  },
  {
    "id": 4,
    "name": "Utility Payment",
    "description": "Utility Payment",
    "imageUrl": "/images/governmetn.jpg"
  }
]
```

2-Get Billers under single phase category 3

198.162.1.51:8040/api/v1/category/billerByCategoryId/3

```
[
  {
    "id": 5,
    "name": "zain",
    "description": "Zain Services 1",
    "imageUrl": "/images/zain.png"
  }
]
```

3-Get Services under Biller 5

198.162.1.51:8040/api/v1/biller/servicesByBillerId/5

```
[
  {
    "id": 7,
    "name": "Zain TopUp",
    "description": "ZainTopUp Payment",
    "isPayment": true
  }
]
```

4- Get Parameters for service 7:

198.162.1.51:8040/api/v1/service/parameterByServiceId/7

```
[
  {
    "id": 1,
    "name": "Phone Number ",
    "description": "Phone Number",
    "internalKey": "mobile",
    "orderNo": 1,
    "regex": "^(09)\\d{8}$",
    "inputType": 1,
    "jsonType": 1,
    "paramType": 3,
    "length": 10,
    "minValue": -1.0,
    "maxValue": -1.0,
    "option": []
  },
  {
    "id": 5,
    "name": "amount",
    "description": "Amount",
    "internalKey": "amount",
    "orderNo": 1,
    "regex": null,
    "inputType": 1,
    "jsonType": 1,
    "paramType": 1,
    "length": -1,
    "minValue": 500.0,
    "maxValue": 20001.0,
    "option": []
  }
]
```

5- payment :

1 – One step service (directly payment scenario)

Payment for service 7 under biller 3

Success scenario:

198.162.1.51:8040/api/v1/payment/process

Request:

```
{
  "id":3,
  "serviceId":7,
  "accountFrom":"123333333",
  "parameters":[
    {
      "id":1,
      "key":"mobile",
      "value":"0907812682"
    },
    {
      "id":5,
      "key":"amount",
      "value":"500"
    }
  ]
}
```

Response:

```
{
  "responseCode": 0,
  "responseMessage": "Successfull",
  "bankReference": "851957960024100",
  "response_params": [
    {
      "key": "mobile",
      "value": "0907812682",
      "displayName": "Phone Number ",
      "id": 1
    },
    {
      "key": "responseMessage",
      "value": "success",
      "displayName": "Response Message",
      "id": 3
    }
  ],
  "final_status": 0,
  "isPayment": false,
  "request_params": null
}
```

Fail scenario:

<http://198.162.1.51:8040/api/v1/payment/process>

```
Request :
{
  "id":3,
  "serviceId":7,
  "parameters":[
    {
      "id":1,
      "key":"mobile",
      "value":"0996545853"
    },
    {
      "id":5,
      "key":"amount",
      "value":"500"
    }
  ]
}
Response:
{
  "responseCode": -1,
  "responseMessage": "Request invalid account Is empty",
  "response_params": null,
  "final_status": -1,
  "isPayment": false,
  "request_params": null
}
```

2-Two step service (query then pay scenario)

<http://198.162.1.51:8040/api/v1/category>

```
[
  {
    "id": 1,
    "name": "Telecom",
    "description": "Telecom",
    "imageUrl": "/images/telecom.png"
  },
  {
    "id": 2,
    "name": "Government",
    "description": "Government Services",
    "imageUrl": "/images/governmetn.jpg"
  }
]
```

```

    },
    {
      "id": 3,
      "name": "Single Phase",
      "description": "Single Phase",
      "imageUrl": "/images/governmetn.jpg"
    },
    {
      "id": 4,
      "name": "Utility Payment",
      "description": "Utility Payment",
      "imageUrl": "/images/governmetn.jpg"
    }
  ]

```

198.162.1.51:8040/api/v1/category/billerByCategoryId/1 [

```

    {
      "id": 1,
      "name": "zain",
      "description": "Zain Services 1",
      "imageUrl": "/images/zain.png"
    },
    {
      "id": 1,
      "name": "zain",
      "description": "Zain Services 1",
      "imageUrl": "/images/zain.png"
    },
    {
      "id": 2,
      "name": "sudani",
      "description": "Sudani Services",
      "imageUrl": "/images/mtn.jpg"
    },
    {
      "id": 2,
      "name": "sudani",
      "description": "Sudani Services",
      "imageUrl": "/images/mtn.jpg"
    },
    {
      "id": 6,
      "name": "zain PostPaid",
      "description": "Zain Services 1",
      "imageUrl": "/images/zain.png"
    }
  ]

```

198.162.1.51:8040/api/v1/biller/servicesByBillerId/6

```
[
  {
    "id": 8,
    "name": "ZAIN POSTPAID",
    "description": "ZAIN POSTPAID",
    "isPayment": false
  }
]
```

198.162.1.51:8040/api/v1/service/parameterByServiceId/8

```
[
  {
    "id": 26,
    "name": "Phone Number ",
    "description": "Phone Number",
    "internalKey": "mobile",
    "orderNo": 1,
    "regex": "^(09)\\d{8}$",
    "inputType": 1,
    "jsonType": 1,
    "paramType": 3,
    "length": 10,
    "minValue": -1.0,
    "maxValue": -1.0,
    "option": []
  }
]
```

198.162.1.51:8040/api/v1/payment/process

First step as enquiry sending only necessary fields

```
{
  "id": 1,
  "serviceId": 8,
  "parameters": [
    {
      "id": 26,
      "key": "mobile",
      "value": "0907812682"
    }
  ]
}
```

The Api will return the payment service parameters in "request_params" field and service id in "final_status" field.

```

    "responseCode": 0,
    "responseMessage": "Successful",
    "response_params": [
      {
        "key": "billAmount",
        "value": 1000,
        "displayName": "Bill Amount ",
        "id": 51
      }
    ],
    "final_status": 9,
    "isPayment": true,
    "request_params": [
      {
        "id": 29,
        "name": "Amount",
        "description": "amount",
        "internalKey": "amount",
        "orderNo": 2,
        "regex": null,
        "inputType": 1,
        "jsonType": 1,
        "paramType": 3,
        "length": -1,
        "minValue": 15.0,
        "maxValue": 1000.0,
        "option": []
      }
    ]
  }
}

```

Second step agent should send the payment necessary parameters plus the inquiry data including the parameters filled by the customer for the inquiry and the parameters returned by the inquiry in "responseParams" field.

```

{
  "id": 1,
  "serviceId": 9,
  "accountFrom": "1223222",
  "parameters": [
    {
      "key": "mobile",
      "value": "0907812682",
      "displayName": "Phone Number ",
      "id": 26
    },
    {
      "key": "billAmount",
      "value": 1000,
      "displayName": "Bill Amount ",
      "id": 51
    }
  ]
}

```

```
{
  {
    "key": "amount",
    "value": "1000",
    "displayName": "Amount",
    "id": 29
  }
}
```

```
{
  "responseCode": 0,
  "responseMessage": "Successful",
  "bankReference": "854640780598000",
  "response_params": [
    {
      "key": "mobile",
      "value": "0907812682",
      "displayName": "Phone Number ",
      "id": 26
    },
    {
      "key": "amount",
      "value": "1000",
      "displayName": "Amount",
      "id": 29
    }
  ],
  "final_status": 0,
  "isPayment": false,
  "request_params": null
}
```
